

miji

see yourself clearly

PRESS FACT SHEET

MARCH 2026

miji is the first emotional awareness companion. It uses on-device perception to help you understand how you feel, track your patterns over time, and share your emotional day with the people who matter. Everything runs locally on your phone. Your data never leaves your device.

WHAT MIJI DOES

FACE READING

Open the app and your camera reads your expression in moments. No prompts, no mood wheels. miji shows you what it sees.

JOURNALING

Speak or type. miji responds to your words, your expression, and your voice. Five gold words surface at the end of each session.

SCORING

A single daily number built from your own baseline. Not a population average. Your patterns become visible over weeks and months.

CONNECTIONS

Track how your emotional baseline shifts around specific people. Share your daily card with friends without overexposing specifics.

PRIVACY

Everything runs on-device. Camera and mic data is processed locally and discarded immediately. Even we cannot access your data.

COMPANY

BUILT BY	CO3 ONE
FOUNDED	2025
HEADQUARTERS	United States
CATEGORY	Emotional Awareness / Personal AI
PLATFORM	iOS (Android planned)
STATUS	Waitlist open
WEBSITE	co3.one
CONTACT	press@co3.one

KEY DIFFERENTIATORS

100% ON-DEVICE

No cloud processing of personal data. Face, voice, and journal content never leave the phone.

PERSONAL BASELINE

Scores are relative to you, not a population norm. No ranking, no comparison.

ZERO SURVEILLANCE

No activity feeds, no notifications about others unless mutually opted in. No data sold.

THREE-SECOND CHECK-IN

Open the app and miji reads you. The fastest emotional check-in available.
